

www.asapwrap.com

The smallest, most efficient
pallet wrapper you'll
ever use.

PATENT PENDING

Save Money!

Machine cost: The Wrap-N-Go is about 1/4 the price of a good quality turntable wrapper.

Consumables cost: The Wrap-N-Go uses standard 20" machine wrap rolls, which are 1/8th the cost of the larger, less efficient rolls required for most portable wrappers.

Save Time!

The Wrap-N-Go can wrap a full pallet in as little as 30 seconds!

Most turntable wrappers take several minutes at best.

Bring the Wrap-N-Go to the pallet and wrap once—where the product is palletized!

Turntable solutions require you to transport the pallet to the machine, requiring you to secure the load with stretch wrap or tape before you wrap the pallet!

Save Space!

The Wrap-N-Go takes up less than 1/4 pallet space to store. You can wrap a pallet in a space as tight as a 7-foot wide aisle.

An average turntable wrapper takes up 3 pallet spaces and needs several more clear around it.

Multiple rolls make it easy to wrap any pallet size or shape

Smooth electric lift of rolls allows for a wrap height of 84"

High-gloss yellow powder coat is durable and makes it simple to see the Wrap-N-Go in a crowded area.

Easy one-handed operation

Portable & Versatile

- ✓ Wraps any odd-shaped pallet with ease!
- ✓ Use 1, 2 or 3 rolls, depending on pallet height!
- ✓ Recharge battery at any standard outlet!
- ✓ Assembles in minutes with simple hand tools!
- ✓ Weighs less than 225 lbs. (fully loaded) with a footprint of only 2' x 3'!

Bottom roll is lower than most skids so product is secured to pallet

Powerful sealed AGM battery can wrap more than 100 pallets on a single charge

Smooth rolling premium casters roll over cracks and small debris

Front swivel casters make it easy to turn in tight spaces
